## All Saints School

August 4, 2015

Dear Parents, Teachers, Staff and Building Occupants

Uncontrolled asbestos contamination in buildings can be a significant environmental and public health problem. Both the public and private sectors have been dealing with the asbestos issue for many years. In 1986, Congress enacted the Asbestos Hazard Emergency Response Act (AHERA) primarily to require school districts to identify asbestos-containing materials (ACM) in their school buildings and take appropriate actions to control the release of asbestos fibers. In 1987, the U.S. Environmental Protection Agency (EPA) finalized a regulatory program which enforces the AHERA.

In compliance with the AHERA regulations, we had our school facilities inspected by an EPA accredited building inspector. During the inspection, samples were taken of building materials suspected of containing asbestos. The results of the inspection and laboratory analysis of the samples have confirmed the presence of ACM in portions of the school facilities. It is important to note that these materials are in a form and condition that does not pose a health threat to students, faculty or employees.

With confirmation of the presence of ACM, an Asbestos Management Plan was developed for our schools by an EPA accredited management planner. The Management Plan includes the inspection and physical assessment reports, the training program for our custodial and maintenance personnel, the plans and procedures to be followed to minimize disturbance of the asbestos-containing materials, and a program for regular surveillance of the ACM. Every three years, a reinspection by an accredited inspector must be conducted on all friable and non-friable known or assumed asbestos containing building materials (ACBM) to determine whether the condition of the ACBM has changed and to make recommendations on managing or removing the ACBM.

During the 2015/16 school year we will conduct two periodic surveillance inspection in the fall of 2015 and spring of 2016 to check the condition of the asbestos and to determine if any action is needed.

For further details on the locations of the ACBM or on the asbestos activities, you are welcome to review a copy of the Asbestos Management Plan in our school administrative office during regular office hours. Mr. David Hodgkin, Risk Management/Environmental Coordinator of the Archdiocese of Portland, is our asbestos program coordinator and all inquiries regarding the plan should be directed to him at (503) 233-8313.

Sincerely,

A handwritten signature in black ink that reads "Ms. Rose Rosinski".

Ms. Rose Rosinski  
Principal
